

# SEAMLESS, RELIABLE AND COMPLIANT LOGISTICS FOR INNOVATIVE PHARMACEUTICALS

Creating end-to-end logistics and transport solutions for time and temperature sensitive innovative pharmaceutical products

With innovative pharmaceutical manufacturers requiring careful handling to meet strict product integrity standards, while also seeking to reduce delivery lead times, world-class logistics partners are critical to bringing today's innovative drugs to market. We specialise in compliant healthcare logistics tailored for life-saving time and temperature-sensitive medicines. With end-to-end solutions that both reduce lead time to market while ensuring seamless, temperature-controlled transport, we make efficiency, flexibility, and reach possible for the pharmaceutical sector. From cold chain warehousing to white glove services, our complete supply chain experience is transforming the delivery of critical healthcare products worldwide.

## STRENGTHENING HEALTHCARE IN AFRICA AND THE MIDDLE EAST

To help a global pharmaceutical producer safely distribute high-value, temperature and time sensitive products throughout the MENA region, we:

- Built regulatory compliance, customs brokerage, secondary packaging, lane risk assessment and transport infrastructure
- Integrated real-time visibility into our GDP-certified cold chain storage facility and our secure air transport solutions

We made navigating pharmaceutical trade regulations simpler and enhanced the safety of transport from factory floor to customer door in these emerging markets.

## HEALTHCARE FOR PEOPLE AND OUR PLANET:

To help the pharmaceutical sector save lives sustainably, we have revised our decarbonisation target to achieve more ambitious reductions in our Scope 1 and 2 emissions by 2030. We have already reduced our emissions by 13% against our 2022 baseline.

## SERVICES INCLUDE:

- End-to-End monitoring and control tower visibility
- Network of GxP-compliant warehousing and value-added services
- Temperature controlled International transportation
- Nearshoring opportunities through 11 existing Parks and Economic Zones
- End-to-End monitoring and control tower visibility
