

# DP WORLD: DELIVERING ADVANCED MEDTECH WITH CARE AND AGILITY

Providing full end-to-end supply chain management for medical devices to hospitals, clinics and healthcare facilities

We reimagine end-to-end supply chain solutions for medical devices, ensuring their safe, precise delivery, installation, and removal worldwide. Supported by our global network, we provide white glove services, cold chain logistics, and seamless integration across air, ocean, road and rail transport. Certified to the industry standards, we are a trusted MedTech partner and have a global footprint in over 75 countries, with the capability to reliably deliver for healthcare facilities worldwide.

## CUSTOM LOGISTICS SOLUTIONS: SAFE TRANSPORT OF MEDICAL GOODS

To create custom transportation for a leading medical technology company to move medical freight from Ireland to the Netherlands, we:

- Designed vented trailers with power-assisted fans and rear door vents to remove EO gases during transit.
- Transported medical freight from sterilisation sites in Galway and Tullamore to the EO testing facility, then to a warehouse in Kerkrade, Netherlands.
- Ensured daily, seamless freight movement from Germany directly to Galway for 24-hour operations..

Our collaboration with our customer ensured the safe and efficient transport of medical devices across multiple locations.

## WHITE GLOVE SERVICES

We tailor our transportation, installation, and removal services for every customer's unique needs. Key features include modern equipment, real-time tracking, 24/7 monitoring, data logging, and highly trained personnel, delivering safe and efficient servicing for high-tech medical devices in all markets.

## SERVICES INCLUDE:

- Global Ocean, Air rail, road and short-sea connectivity
- White glove services
- TAPA FSR-A and GDP accredited
- Next-gen Control Tower visibility
- Hospital delivery, assembly and reverse logistics
- Technical service and repair centres
