GLOBALISATION AND THE GROWTH OF THE CONTAINER

CONTAINER PORTS CHARACTERISTICS

- Resilient volumes, high cash generation, and limited operators.
- Light regulation – cost of container handling is less than 10% of total transport logistics.
- High entry barriers – capital expenditure heavy, strategic assets.

WHY DOES A MULTIPLIER EXIST?

- Distance between manufacturing and consumption location requires transshipment which leads to containers being handled more than once.
- Trade imbalance leads to empty repositioning.
- Low container penetration rates in emerging markets.

More than 80% of cargo is transported on Sea

World container traffic vs. World GDP

CONTAINERISATION PENETRATION RATES REMAIN LOW
