

PORT CENTRIC LOGISTICS

Port-centric logistics describes the location of logistics and distribution services when goods arrive. It is considered an alternative to inland depots and centrally located national distribution centers. It allows you to store your shipment at the port and decrease the number of handling stages throughout your storage and distribution process, saving time and money.

OUR SERVICES

In our current Container Freight Station (CFS) we offer the following services which are an extraction of Port centric Logistics:

STRIPPING

STUFFING

LASHING

CONTAINER WASHING

RF PRE-TRIP

STORAGE

CUSTOMS INSPECTION
